Selenium Automation Testing with Project	
SNo	Syllabus
Project Automation by Selenium	
1	Introduction of selenium
2	Web element
3	Types of Web elements
4	Operations of Web element
5	HTML for Web elements
6	Locators for Web element
7	Add-ons a)Chropath b)Xpath c) Developer tools
8	Selenium components
9	a)Selenium IDE
10	a1.Commands / Verification and Assertions
11	a2.Test Suite
12	a3.Automation scripts for test cases
13	b)Selenium RC
14	c)Selenium WebDriver
15	d)Selenium Grid
Java	
1	Project Structure
2	Packages
3	Classes Structure
4	Method Structure
5	Variables
6	Access Modifiers
7	Class
8	Object
9	Methods types
10	Inheritance
11	Interface
12	Polymorphism
13	a.Overloading
14	b.Overriding
15	Abstraction
16	Encapsulation
17	ExceptionHandling
18	Collections
Selenium Webdriver	

1	Inspecting Web element
2	Locators types
3	Xpath
4	Browser Commands
5	Web element Access commands
6	Web element commands
7	window handle commands
8	Action commands
9	Synchronization commands
Selenium Webdriver Automation scripts	
10	Script for valid&Invalid Test cases
Automation Frameworks	
11	Framework
12	a)Sequential framework
13	b))Modular framework
14	c)Data driven framework
15	d)Keyword driven framework
16	e)Hybrid framework
TestNG framework	
17	Script with TestNG annotations
18	Batch Run with XML file
19	Parameterizing Tests- Dataprovider for Data Driven Testing
20	Database Testing
Regression Testing	
20	Script for Regression Testing with framework
Data driven Testing	
21	Script for DataDriven Testing with framework
Cross Browser Testing	
22	Script for Cross Browser Testing with framework
Others	
1	Excel Read&Write by Java
2	Github For Cloud repository Management
3	Maven Project
4	Jenkins concepts for build management
5	AutoIT for window based application scripts
